DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that Claim Rejections - 35 USC § 102

form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent (e) the invention was described in (1) an application for patent, published under section 122(0), to another filed in the United States before the invention by the applicant for patent or (2) a patent another filed in the United States before the invention by the applicant for patent by another filed in the United States before the invention by the applicant for patent by another filed in the United States before the invention by another filed in the United States before the invention by the applicant for patent or (2) a patent or the invention by the applicant for patent or the invention by the granted on an application for patent by another filed in the United States before the invention by the applicant for patent except that an international application filed under the treaty defined in section applicant for patent except that an international applicant for patent except that except the excep A person shall be entitled to a patent unless granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application of an application filed in the United States applicant for patent, except that an international application of an application filed in the United States applicant for patent, except that an international application of an application filed in the United States before the inventor states are understood application filed in the United States before the inventor by another filed in the United States before the invention by the application for patent by another filed in the United States before the invention by the application filed under the treaty defined in section application filed under the treaty defined in section applicant for patent, except that an international application of an application filed in the United States before the invention by the applicant for patent, except that an international application of an application filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are understood as a policing filed in the United States are applicant for patent, except that an international application filed under the treaty defined in section as a specific patent, except that an international application of an application filed in the United States and was published under Adials 21(2) apply if the international application designated the United States and was published under Adials 21(2). 351(a) shall have the effects for purposes of this subsection of an application filed in the United States and was published under Article 21(2) only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language

Claims 1-3, 7-10, and 19-20 are rejected under 35 U.S.C. 102(e) as being of such treaty in the English language.

2.

Re Claims 1, 7, Koshino teaches in fig. 2, the Internet Connection Device 11 anticipated by Koshino U.S. Patent Number 6,603,763. (PCF) coupled to plurality of Packet switches (at least one Packet Data Servicing Node.)

Wherein within 11 includes 106 (generating a record of unique PSDN ID numbers) Private IP address (PSDN ID number) associated with a Group-Packet SW (See fig. 6 &

Col. 5, lines 24-56); in particular the 106 is used of to select (selecting a PDSN) a particular Packet switch to provide a connection with an mobile station for the received

Re Claim 2, refer to Claim 1, see fig.4C teaches Private IP address associated with Mobile Station ID (See col. 7, lines 1-40) wherein it is inherent that each mobile IP packet. station is assigned with ID number.

Re Claims 3, 10, refer to Claim 1, fig. 6 teaches a plurality of SW (n PDSNs) Art Unit: 2663 wherein each SW is associated its own Private Address Group (a unique IP address); fig. 4A teaches memory 103 that associates Global IP address with Private IP address (ordered sequence of PSDN ID numbers cross-referenced to the IP addresses).

Re Claims 8, 20, refer to Claim 2, in table of Fig. 4B, depending on the received IP packet (the selection of the first PDSN ID), the table 106 provides switch selection based on the total number of SW already mapped within the table, hence the selection of the SW is inherently responsive to all mapped switches; furthermore, total number of SW (n) could be one switch associated with a single IP address.

Re Claim 9, refer to Claim 7, wherein PW includes forwarding the received packet to another PW based on the location of the mobile (See col. 6, lines 25-68), hence, PS enable handover to another PS regardless of the 11.

Re Claim 19, refer to Claim 1, fig. 1 teaches the Packet SW coupled to MS for providing packet data service, wherein the MS (a first mobile station) is inherently identified with an ID number and is equipped with an transceiver; fig. 2 teaches (m=1) Internet Connection Device 11 with plurality of ports (R1-T1) for providing connection to MS to the Internet 10 (packet data communications with an IP address); 11 is also coupled to plurality of Packet switches (a plurality of n Packet Data Servicing Nodes) wherein fig. 3 teaches plurality of ports of SW, wherein memory 202 maps Private IP address with ID number (unique IP address and a unique ID number).

Art Unit: 2663

Allowable Subject Matter

3. Claims 4-6, 11-18, 21-27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject

In combination with Claims 1-4; 7-11; 19-21, prior art fails to the PFC selects the first PDSN ID number by dividing the first MS ID by the number of (n) PDSNs in the table.

Response to Arguments

4. Applicant's arguments with respect to claims 1-3, 7-10, and 19-20 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP \$706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 2663

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Lee whose telephone number is 703-305-1500. 6. The examiner can normally be reached on Monday to Friday from 8:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau Nguyen can be reached on 703-308-5340. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
